PIPING SPECIALISTS

RE: Conflict Materials

Stainless Piping Specialists (SPS) is concerned that conflict minerals are extracted from military conflict regions of the Democratic Republic of Congo (DRC) and adjoining countries recognized worldwide for human rights violations and environmental degradation.

These materials include tantalum, tin, gold and tungsten (collectively known as “Conflict Materials”).

Stainless Piping Specialists has conducted an inquiry with its suppliers to confirm that no materials used are Conflict materials derived from the DRC.

Stainless Piping Specialists will continuously work with its suppliers to assure that SPS products are “DRC Conflict Free”.
